

The screenshot displays the RMeasiteach software interface. The main window is titled "Can it change back?" and features a lesson titled "Pog's Popsicle lesson". The lesson content includes a green alien character named Pog holding a yellow popsicle, a refrigerator, and a sun. Below the illustrations, the text reads: "Teach Pog how to get his popsicle back again." and "Teach Pog these words - cooling, physical change, reversible." There are two empty text boxes for student input: "Pog can get his popsicle back by..." and "He can do this because...". The interface also shows a sidebar with navigation options and a bottom toolbar with various icons.
